

METHODS FOR TISSUE CULTURING AND TRANSFORMING ELITE INBREDS OF *ZEA MAYS* L.

5 The present invention is directed to methods for the tissue culture and transformation of elite
inbreds of corn (*Zea mays* L.). More specifically, the present invention is directed to a method for
initiating Type II callus from corn tissue. The present invention is also directed to a method for
enhancing the intergration of foreign DNA in the transformation of corn using a heat shock
treatment. The present invention is further directed to a method of transforming elite inbreds of corn
10 using *Agrobacterium*.
